

## 20 May 2016

### INTERNATIONAL CLINICAL TRIALS DAY

**269** years ago James Lind conducted the first ever clinical trial looking into the link between vitamin C and scurvy. Since then clinical trials have developed a great deal and every year we celebrate his work and the importance of research in health and social care.

In Wales we are joining in the celebrations with a number of **free, fun and interactive** events around the country.

## Join Us IN BANGOR

12.00 - 14.00
